G5CA PCB Power Relay

Flat Relays that Switch 10A/15A Loads Power
• Ideal for switching power in household appliances or for outputs from industrial devices.
• Subminiature dimensions: 16 × 22 × 11 mm (L × W × H).
• High-sensitivity models available with low power consumption (150 mW).
• Standard model conforms to UL/CSA standards.
• Sealed models are available
• Quick-connect terminal models are also available (#187 load contact terminals).
• IEC/EN 60335-1 conformed. (-HA Model)

Model Number Legend

G5CA-1A □-□-□-□-□
1. Number of Poles
1A: 1-pole/SPST-NO (1a)
2. Enclosure rating
None: Flux protection
4: Sealed
3. Terminal Shape
None: PCB terminals
TP: Quick-connect terminals (#187)
4. Classification
None: Standard
E: High-capacity
H: High-sensitivity
5. Coil consumption
None: Standard
H: High-sensitivity
6. Market Code
None: General purpose
HA: Home Appliance according to IEC/EN60335-1

Application Examples
• Small home appliances

Note 1. When ordering, add the rated coil voltage to the model number.
Example: G5CA-1A DC5
However, the notation of the coil voltage on the product case as well as on the packing will be marked as □□VDC.
Note 2. Contact your OMRON representative for details on other coil voltage specifications.
Note 3. High-capacity models with sealed structure are not available.
Note 4. Standard or high-sensitivity models with quick-connect terminals are not available.

Ratings

Classification | Item | Rated voltage | Rated current (mA) | Coil resistance (Ω) | Must-operate voltage (V) | Must-release voltage (V) | Max. voltage (V) | Power consumption (mW) |

</tbody>
</table>

Note 1. The rated current and coil resistance are measured at a coil temperature of 23°C with a tolerance of ±10%.
Note 2. The operating characteristics are measured at a coil temperature of 23°C.
Note 3. The “maximum voltage” is the maximum voltage that can be applied to the relay coil.

### Characteristics

- **Contact resistance**
  1. 30 mΩ max. (Quick-connect terminals type: 100 mΩ max.)

- **Operate time**
  1. 10 ms max.
  2. 15 ms max. (High-sensitivity models)

- **Release time**
  1. 10 ms max.

- **Insulation resistance**
  1. 1,000 MΩ min.

- **Dielectric strength**
  1. Between coil and contacts: 2,500 VAC, 50/60 Hz for 1 min
  2. Between contacts of the same polarity: 1,000 VAC, 50/60 Hz for 1 min

- **Impulse withstand voltage**
  1. 4,500 V (1.2 x 50 μs)

- **Vibration resistance**
  1. Destruction: 10 to 55 to 10 Hz, 0.75-mm single amplitude (1.5-mm double amplitude)
  2. Malfunction: 10 to 55 to 10 Hz, 0.75-mm single amplitude (1.5-mm double amplitude)

- **Shock resistance**
  1. Destruction: 1,000 m/s²
  2. Malfunction: 200 m/s²

- **Failure rate**
  1. 5 VDC, 100 mA (Reference value *3)

- **Ambient Operating temperature**
  1. -25°C to 70°C (with no icing or condensation)

- **Ambient Operating humidity**
  1. 5% to 85%

- **Weight**
  1. Approx. 8 g (for TP model: Approx. 9.6 g)

Note: Values in the above table are the initial values at 23°C. 
*1. Measurement conditions: 5 VDC, 1 A, voltage drop method.
*2. Measurement conditions: Measured at the same points as the dielectric strength using a 500 VDC ohmmeter.
*3. This value was measured at a switching frequency of 120 operations/min.

### Engineering Data

#### Maximum Switching Capacity

- **Switching current (A)**
  1. Continuous: 10 A (100,000 operations min.)
  2. Continuous: 15 A (100,000 operations min.)

- **Switching voltage (V)**
  1. Continuous: 30 VDC (100,000 operations min.)
  2. Continuous: 250 VAC (100,000 operations min.)

Note. The "maximum voltage" is the maximum voltage that can be applied to the relay coil.

#### Durability

- **Switching current (A)**
  1. Continuous: 10 A (100,000 operations min.)
  2. Continuous: 15 A (100,000 operations min.)

- **Switching voltage (V)**
  1. Continuous: 30 VDC (100,000 operations min.)
  2. Continuous: 250 VAC (100,000 operations min.)

#### Operating Temperature vs. Must-operate/Must-release Voltage

- **Switching current (A)**
  1. Continuous: 10 A (100,000 operations min.)
  2. Continuous: 15 A (100,000 operations min.)

- **Switching voltage (V)**
  1. Continuous: 30 VDC (100,000 operations min.)
  2. Continuous: 250 VAC (100,000 operations min.)

Note. The "maximum voltage" is the maximum voltage that can be applied to the relay coil.

#### Shock Malfunction

- **Sample: G5CA-1A**
  1. Number of Relays: 5 pcs
  2. Measured value: The value at which malfunction occurs in the contact when the contact is subjected to shock three times each in six directions for three axes.

Standard: 200 m/s²

Clearance distance 1.6 mm min.
Creepage distance 3.2 mm min.
Insulation material group Illa
Type of insulation coil-contact circuit Basic
open contact circuit Micro disconnection
Rated insulation voltage 250 V
Pollution degree 2
Rated voltage system 250 V
Over voltage category II
Category of protection according to IEC 61810-1 RT II (Flux protection) / RT III (Sealed)
Glow wire according to IEC 60335-1 ed.5 <HA Models only>
GWT 750°C min. (IEC 60695-2-11) / GWFI 850°C min. (IEC 60695-2-12)
Tracking resistance according to IEC 90112 PTI 250 V min. (housing parts)
Precautions

● Please refer to “PCB Relays Common Precautions” for correct use.

Correct Use

● Mounting
  • Make sure that sufficient space is provided between relays when installing two or more relays side by side to facilitate heat dissipation. Insufficient heat dissipation may result in the relay malfunctioning.

● Quick-connect Terminal Connections
  • Do not pass current through the PCB of the load contact terminals (quick-connect terminals).
  • The terminals are compatible with Faston receptacle #187 and are suitable for positive-lock mounting. Use only Faston terminals with the specified numbers. Select leads for connecting Faston receptacles with wire diameters that are within the allowable range for the load current. Do not apply excessive force to the terminals when mounting or dismounting the Faston receptacle. Insert and remove terminals carefully one at a time. Do not insert terminals on an angle, or insert/remove multiple terminals at the same time.

The following positive-lock connectors made by AMP are recommended. Contact the manufacturer directly for details on connectors including availability.

<table>
<thead>
<tr>
<th>Type</th>
<th>Receptacle terminals</th>
<th>Positive housing</th>
</tr>
</thead>
<tbody>
<tr>
<td>#187 terminals (width: 4.75 mm)</td>
<td>AMP 170330-1 (170324-1) AMP 170331-1 (170325-1) AMP 170332-1 (170326-1)</td>
<td>AMP 172074-1 (natural color) AMP 172074-4 (yellow) AMP 172074-5 (green) AMP 172074-6 (blue)</td>
</tr>
</tbody>
</table>

* The numbers shown in parentheses are for air-feeding.

● Charged Terminals
  • The section marked with dotted circles (indicated by arrows) in the following diagram includes the charged terminals of the relay. When the relay is mounted on a PCB, make sure that there are no metal patterns on the section of the PCB facing the portion of the relay shaded in the following diagram.

● Other Precautions
  • The G5CA is a power relay designed for applications switching power loads such as heaters in electric household appliances. Do not use the G5CA to switch micro loads less than 100 mA, such as in signal applications.
  • Use fully sealed models if the relays will require washing. Flux-protection models may malfunction or the relay’s performance may be otherwise adversely affected if cleaning fluid enters the relay.

Application examples provided in this document are for reference only. In actual applications, confirm equipment functions and safety before using the product.

Consult your OMRON representative before using the product under conditions which are not described in the manual or applying the product to nuclear control systems, railroad systems, aviation systems, vehicles, combustion systems, medical equipment, amusement machines, safety equipment, and other systems or equipment that may have a serious influence on lives and property if used improperly. Make sure that the ratings and performance characteristics of the product provide a margin of safety for the system or equipment, and be sure to provide the system or equipment with double safety mechanisms.

Note: Do not use this document to operate the Unit.
